Biomedical & Health Informatics Colloquium

Sponsored by the CCTS and the Department of Biomedical and Health Information Sciences

12:00 pm – 1:00 pm
College of Medicine Research Building
909 S. Wolcott, 5th Floor, Conference Room 5175

January 26, 2015
“Public Patient Safety Reporting in the Error of ICD-10-CM: Will we be less safe?”
Andrew D. Boyd, MD, Assistant Professor, Biomedical and Health Information Sciences, Clinical Informatician, Biomedical Informatics, Center for Clinical and Translational Sciences, UIC

February 23, 2015
“Informatics and Forensic Medicine”
Bruce Levy, MD, Associate Professor of Clinical Pathology, Director of Informatics, Department of Pathology, UIC

The purpose of the colloquia is two-fold: to provide a forum for presenting current and ongoing research and to help connect researchers with one another. Because informatics is so extraordinarily broad and diverse, the colloquia aims to help researchers at UIC keep a pulse on activities outside of their immediate research interest and help to spur additional collaborations.

Physicians from all disciplines, allied health professionals, graduate and undergraduate students are all welcome to attend. A light lunch will be served.

RSVP to Sherrell Brown at shbrown@uic.edu

The University of Illinois at Chicago (UIC) Center for Clinical and Translational Science (CCTS) is supported by the National Center for Advancing Translational Sciences, National Institutes of Health, through Grant UL1TR000050.
